AQUARIUM

2141 CRESCENT AVE.
St. Louis, Mo.

View of Our Fish Hatchery

Located 12 miles west of St. Louis on a 40-acre tract of land. Our facilities for the propagation of fancy fish and water lilies are second to none. Concrete vats 100 feet long are housed in these buildings for breeding tropical fishes. Admission by card only, which may be obtained at the office. Over ninety large concrete tanks outdoors are stocked with all kinds of water lilies and plants ready for immediate shipping.

Visitors Welcome

Our location is 6200 West and 2100 North.

Drive to 6200 Easton Ave. and go North on Kienlen to Bailey Place, one block west on Bailey Place.

Via street car—take any street car to Wellston and transfer to the St. Peters bus. Get off at Crescent Ave. and walk one-half block North.

Our retail store is open daily from 8 a. m. to 5 p. m. Evenings by appointment only. Sundays from 9 a. m. until 1 p. m.

Closed on Holidays.
Phone EVERgreen 7265.

View of Our Lily Ponds

Hardy water lilies and many other aquatics are propagated on a 52-acre tract about 69 miles west of St. Louis. The photograph shows the "Sunshine Water Lilies" in a natural setting. The Lotus bed can be seen in the background near the shore line. The lake is used also for propagating game fish and we are able to supply young crappie, bass and various sunfishes in the fall of the year for re-stocking of private ponds.

FACILITIES

Our facilities enable us to serve you efficiently. Our large volume of business and our many years of experience permit us to give you the highest quality merchandise at lower prices. Most all shipments are made the same day the order is received, except where orders call for seasonable supplies, such as water lilies, etc., for which we place orders on file for spring shipment as early as January and February. Order early! Do not wait until the late spring to order your lilies as we may be sold out of some of the varieties.

We are centrally located and whether you live in New York City or Denver, Colo., fast express trains will reach the destination within 24 hours. We ship to all parts of the world; distance is no object.

Try an order from Beldt's and be convinced of the superior quality of our merchandise.

MERCHANDISE

Only Beldt offers a complete variety of aquatic supplies. We offer a complete line of fish aquariums, remedies, fishfoods and heaters. Many features in our catalog are exclusive, such as the especially constructed heavy duty wrought iron and angle iron roller stands with heavy casters for large aquariums, so that these aquariums may be moved away from the window should the necessity arise.

For the pool we also have a very complete line of fancy goldfish, including the rare Lionheads, Orandas and Golden Orf.

You will find our aquarium plants of the highest quality, all greenhouse grown. We guarantee to send you healthy and vigorous water lilies, all true to name, at the proper planting time for your locality. No matter what you want, if you do not find it listed in our catalog, write us.

Customer's testimonials are unsolicited and may be viewed at any time.

THE SUCCESSFUL WATER GARDEN

The success with water gardens depends on quite a number of features. One of the most important of these features is sufficient sunlight and equally important is the depth of the pond. A number of subjects may be taken into consideration when you determine the depth of your pool. If you only consider the planting of water lilies, then your pool will be deep enough if you make it from 18 to 20 inches, but if you want to keep goldfish in your pool and you want to keep them over the winter, you should have a certain water depth of usually about 36 inches, and in some localities even deeper water is required. One can readily understand that everything should be taken into consideration in order to have the type of pool that will take care of your particular requirements.

Location

The location of the pool should be where it receives a lot of sunlight. Plenty of sunshine is absolutely necessary for the growth and success of water lilies and all

A pool 3 feet deep is best. In considering the depth of your pool you cannot disregard the fact that you may want to leave your goldfish in this pool over

prevent the goldfish from dying over the winter.

Concrete Mixture

Use three wheelbarrows full of gravel, two wheelbarrows full of sand and one sack of cement.

Lily pool of Silas W. Rogers, of El Dorado, Arkansas, showing a nice growth of cattails, water hyacinths and other bog plants, also tropical water lilies. An informal pool with a rough rock edge.

winter. While a 3 foot depth is too deep to plant water lilies, this depth is an absolute necessity for keeping your goldfish

This makes a good concrete mixture for the average pool. For finishing work you should use a wheelbarrow three-quarters full of sifted sand to one sack of cement. All concrete work should be in the neighborhood of six inches thick. Reinforcing of this concrete may be accomplished through the aid of ordinary chicken wire laid in the center of this concrete. The sloping walls of the informal pool have a great tendency to prevent breakage as the pressure exerted when the water freezes during the winter time is not as great as if the walls were straight. Therefore, the slanting walls really have two good features; one is that they do not crack as easily during the winter time, and the other that it is much cheaper to build the walls than if you would have to build a form to retain them.

The Formal Pool

Formal pools may be constructed in all various shapes. The formal pool as a rule is built into the center of the garden or near the center. In constructing the form work for a formal pool, it is a good practice to set this form work about six inches from the bottom on small pegs of wood so that the bottom and sides can

all be poured at one time. After these forms are removed, pull these small pegs of wood out of the bottom and fill them in with concrete finish when the pool is finished. This in no way will weaken the general structure of the pool. Reinforcement may be used, though the writer has never used much reinforcement in any pool. At our plant near Florissant, St. Louis County, Missouri, we have around 100 concrete tanks varying in size from 6x10 feet to 20x30 feet and the only reinforcement we used in their construction is that we lay one large iron rod about ½ inch thick into the center of the wall of the pond about 4 inches below the surface of the ground. The contention is that while water freezes, it exerts its most pressure on the concrete right near

Lily pool of the Baybay Agricultural High School, Philippine Islands. Mr. Fred Warner, principal, writes: "Enclosed are photographs of two of our lily ponds, in which are blooming fifteen kinds of Beldt's water lilies. Of course the pictures give no idea of the color display."

kinds of aquatic plants. Therefore, build the pool away from large trees and away from buildings in order that it may receive a maximum amount of sunlight.

healthy over the winter, and in some localities even a greater depth is to be preferred. In a southern climate 20 inches of depth is all that is required to

Mrs. E. T. Young of Warren, Indiana, enjoying the fragrance of water lilies in her pool.

the ground level, or as far as the pool is filled with water. It does not exert any pressure below the ice.

DETAILS OF CONSTRUCTION FORMAL POOL

Let Beldt Supply Your Lily Pool Requirements

and be assured that our 20 years of growing and selling water lilies and fancy fish to thousands of customers all over the world guarantees you absolute satisfaction. You will find our prices very reasonable and the water lilies which we ship all true to name and all healthy and vigorous plants. You will find our collection most complete. No other grower can offer you better quality and lower prices.

HOW TO PLANT YOUR WATER LILIES

Hardy Water Lilies

Can be planted at any depth from 12 inches to 48 inches. They will, however, do best at a depth of about 12 inches because the deeper you plant them the more strength is consumed in under water growth; also the flowers are not quite as strong if they

clump of dirt in which you receive this tropical lily will settle down to the bottom of the box. Do not plant the tropical water lily too deep. It is best to lower the water surface of the pool so that the tropical lilies are not more than 6 inches below the water surface, or else raise the box by placing several bricks under

rich soil and use $\frac{1}{2}$ pint of our Magic Water Lily Food to each box. Very good results and wonderful effects may be had by using a 20 inch square box and planting two tropical lilies to one box. This will give you more flowers from one box and you can also plant different colors and improve the general appearance of your lily pool tremendously. The planting of water lilies is really not different than planting most other kinds of plants except that you set them under water. Never plant your water lilies first and then fill the pool. It is best to have the pool filled at least a week in advance so that the water has had a chance to get warm. The newly planted lilies will grow much better in aged water than in fresh water. Plants do best, and you keep your pool much cleaner, if you do all your planting in various boxes instead of covering the entire bottom of your pool with soil. Never use any kind of metal containers.

your surplus goldfish in the fall of the year and only keep as many goldfish in the pool as you desire to start with next spring. Goldfish become almost lifeless as the water freezes. It must be remembered that they are cold blooded creatures and the colder the water gets, the less they breathe. In fact, after the ice once forms on your pond, you may quit feeding the fish as they do not consume any food until after the ice has disappeared and the water again becomes warmer.

If you wish to bring the fish indoors into the living room for the winter, or keep them in the cellar, adequate provisions must be made to take care of them. Most people overcrowd these goldfish and lose them. When keeping goldfish in an aquarium or trough over the winter, you should not keep over two inches of fish to the gallon of water. It is best to keep them in a cool place. Of course, you can keep them in a warm living room over winter, but if the temperature is 70 or above, then at the most you should keep only one inch of fish to the gallon of water. If a goldfish is two inches long and has a tail two inches long, then you should have four gallons of water to keep it in.

The Care of Goldfish

While we cannot go into the details of breeding and propagating, etc., as this would be too lengthy a subject, we would like to call your attention to a small booklet, "Goldfish and Their Care," which we have listed in this catalog and which can be sent to you for 15c, postpaid. It describes all the diseases and how to prevent them. It also describes the breeding habits and other details useful to you in learning the successful methods of handling goldfish.

We wish, however, to bring out a few important points which everyone should know who keeps goldfish in a pool. In the average pool of three-foot depth, goldfish may be left out during the winter without any danger of loss except if the pool is crowded. That is, if you have raised a lot of goldfish and the pool is very crowded with them, then you should dispose of

Fish Can Not Be Put In a New Pool

A newly constructed pool must be seasoned. That is, when the pool is filled with water for the first time the water absorbs the lime contents in the concrete. This is fatal to the fish as their fins get ragged and rotten. It usually ends in Fungus which is a white cotton like growth on their fins, tails, and body.

How To Prevent Fungus In a New Pool

There are two ways to prevent Fungus in a new pool. The old method is changing the water after letting it stand for about a week. Three changes of water usually removes all this lime sufficiently to prevent any further trouble. The other method is the use of waterproof enamels. These waterproof enamels are listed elsewhere in this catalog and may be obtained in various colors. These asphalt enamels should be applied to dry concrete only, as this asphalt will not adhere to damp walls. Therefore, great care must be taken to see that the concrete is absolutely dry. This asphalt enamel can be supplied in the Black color at \$1.25 per gallon or in 5 gallon cans at \$5.00. One gallon of this enamel will cover from 150 to 250 square feet of surface, all depending on how thick you desire to apply it and how smooth the concrete work is. The thicker you put it on, the more effective is the protection it affords. Asphaltum enamel also stops many leaks as it seeps into the porous concrete. Another quality to be considered is that the asphalt enamel coating prevents algae and other slimy mosses from taking root in the concrete. The water stays clearer and does not get green nearly as quick.

OUR WATER LILIES IN AUSTRALIA

This photograph was mailed to us by R. W. Mildred, 50 Hughes St., North Unley, South Australia. Tropical water lilies are not grown commercially in Australia. We only shipped the tubers as this was much less expensive, and this picture shows the results of the quality tubers we are able to supply. Of course it is much easier if you can set out the lily plants already developed but in Australia, when we have summer here it is winter there, and it would not have been very practical for us to ship tropical water lilies during the winter.

are planted too deep. Use good, rich soil and for each bushel of soil add one pint of our Magic Water Lily Food, which comes in one pint cartons at 35c each. This will insure a vigorous growth and will build up the soil to last for at least two or three years. It is best to lay the hard water lily root flat about 3 inches below the surface of the soil in the box and do not forget to put about 2 inches of sand on top of the box to keep the water clear.

Tropical Water Lilies

Are shipped after the weather is warm, which in the latitude of St. Louis is about May 20th. Southern shipments are made as early as the later part of March. The important thing in planting tropical water lilies is not to plant them any deeper than they have been growing in the pot. Pack the soil down solid so that the compact root growth in the pot in which the lily has been grown will not settle to the bottom of the lily box. In other words, if you leave the soil loose and plant the lilies, there is danger that the

it. Then after the lily has been growing for a month and is well established in your pool, you may lower this box. For planting tropical water lilies use boxes at least 16 inches square and 12 inches deep. Fill them with good

Planting things on the bottom of the pool in pots or boxes is to be preferred to placing soil directly in the bottom of the pool. It is easy to make small wooden boxes or you may use the regular fern pots which are squat shape flower pots. They do not tip over as easy as the standard size pots.

TROPICAL WATER LILIES . . . DAY BLOOMER

BLUE COLORS

Caerulea Blue

Ancient Blue Lotus of the Nile, flowers 4 to 6 inches across, carried well above the water. Price each\$1.00

Henry Shaw

Named in honor of the founder of the Missouri Botanical Gardens. Flowers beautifully blue. Delightfully fragrant. Price each\$1.50

William Stone

This is a beautiful and attractive deep blue-purple lily. The flowers are 8 inches across and star shaped. Price each.....\$1.00

*Mrs. Edward Whitaker

The largest flowering day blooming hybrid from Ovalifolia and Castaliiflora. Colors in shades of light blue or dark blue. Price each.....\$1.00

*Dauben

A well-known viviparous day bloomer. The small light blue flowers are produced freely. A good plant for small pools and aquariums. Price each.....\$1.00

*Marmorata

This variety produces perhaps one of the most beautiful leaves of all tender nymphaeas. The leaves are medium green colored with large blotches and squares of brown. The flowers, which are 12 inches across, are blue on the first day they are open and gradually become lighter. (See color illustration on page 5.) Price each\$1.50

Blue Star

A beautiful deep blue variety about 7 inches across, the flowers at times are carried 18 inches above water. A very strong grower and prolific bloomer. Price each.....\$1.00

Colonel Lindbergh

A deep caerulean blue variety producing flowers up to 12 inches across which tower well above the water. The oval shaped leaves are blotched with brown. Price each.....\$2.00

*All lilies with star in front of name are viviparous, which means that young plants are produced from center of leaves. Tropical lilies should not be planted until latter part of May, or early June, and they should only be planted about 4 or 5 inches below water surface.

Gracillis Rubra (Red Star)—\$1.50 each

BLUE COLORS—Con't.

*Mrs. Woodrow Wilson

A hybrid produced from Mrs. Woodrow Wilson and Castaliiflora. A dark lavender-blue flower, 8 to 10 inches across. Price each.....\$1.25

Violet

A hybrid produced by George Pring. This plant produces distinct curly-edged leaves. Flowers up to 8 inches across are produced in abundance. Colors violet-blue. Fragrant. An outstanding recent introduction. Price each\$1.50

Wm. T. Innes

A sky blue water lily producing large 10 inch flowers in abundance, the leaves are speckled brown, does extremely well in shady pools as well as in sunny exposures. A hybrid of Zansibar rosea and Mrs. G. H. Pring. Our own creation. (See No. 2 Front Cover.) Price each.....\$2.00

Blue Bird

A full flowering navy blue hybrid. The flowers are 8 inches across and produced in abundance. A very good blue. N. Y. Bot. Gardens. Price each.....\$1.50

Pennsylvania (Blue Beauty)

Deep blue flowers which get a foot across if plant is given enough root space. The leaves are speckled brown. A good plant for small or large pools. Price.....\$1.50

PURPLE SHADES

*August Koch

Produced in the lily pools at Garfield Park, Chicago, by Mr. August Koch. The flowers are purple lilac and the petals a pale violet color, 7 to 8 inches in diameter, open four to six days. Price each.....\$1.50

*Royal Purple

A hybrid produced by A. S. Buskirk. A very deep red purple and a strong grower. Flowers 5-6 inches across. Very fragrant. An outstanding recent introduction. (See No. 8 front cover.) Price each.....\$2.00

*Panama-Pacific

A hybrid produced by William Tricker. The predominant color is reddish-purple and the stamens are yellow. Very fragrant and most prolific in blooms. Price each\$1.50

Imperial

A hybrid from August Koch and Caerulea producing very fragrant purple flowers about 6 inches across. A strong grower. Good for smaller pools. Free flowering under crowded conditions. Our own hybrid. (See No. 4, Front Cover.) Price.....\$1.25

PINK SHADES TO RED

General Pershing

A hybrid from Mrs. Whitaker and Castaliifolia. The pink flowers are delightfully fragrant and open early in the morning. Strong plants. Price each.....\$1.50

Zansibar Rosea

A delightfully pink shaded day blooming lily producing flowers about 6 to 8 inches across, very free flowering. (See No. 5-6, Front Cover.) Price each.....\$1.00

*Mrs. Sawyer (Independence)

A new viviparous day blooming lily, the leaves are shaded with brownish red and the flowers are very deep pink. Very vigorous and free flowering. Price each.....\$1.00

Rose Star (Mrs. Ward)

The flowers are carried well above water and get about 8 inches in diameter. They are of a beautiful rose-pink color with long golden stamens. Price each\$1.25

Gracillis Rubra (Red Star)

This star lily has wine red flowers which like the other star lilies are carried well above water. Price each.....\$1.50

Shirley Marie

A large flowering deep pink of unusual merits. The flowers are 10 to 12 inches across. Very free flowering and attractive. A strong grower. N. Y. Bot. Gardens. Price each.....\$2.50

WHITE

Mrs. George H. Pring

A new water lily, pure white in color, flowers 8 to 10 inches across. Very fragrant and prolific. (See No. 1, Front Cover.) Price each\$1.50

Snow White

A hybrid produced from the Independence through self pollination, the flowers are carried erect on a strong stem, are cup-shaped and 6 to 8 inches across. One of the best white tropical lilies. Our own creation. (See No. 3, Front Cover.) Price.....\$2.50

NIGHT BLOOMING TROPICAL WATER LILIES

Sturtevant

Missouri

Victoria Crouziana

The leaves are 5 feet in diameter and the white flowers are 1 to 1½ feet across. Should be planted in at least 8 cubic feet of dirt and requires a water surface of 100 square feet at least to bring it to perfection. Only for very large pools. Price each\$10.00

Lotus Dentata

The flowers are large and cup-shaped. The petals are white and pink tipped. A strong and vigorous grower. Price each.....\$1.00

Devonshire

Bright, rosy red flowers, 8 to 10 inches across, flowers well above the water. Price each.....\$1.00

Frank Trelease

The flowers are tyrian, pink with dark bronzy-red leaves. Price each.....\$1.00

Juno (Dentata Superba)

A magnificent white night bloomer. Flowers from 8 to 12 inches across. The petals are wide open and give the flower a flat appearance. Price each..\$1.50

H. C. Haarstick

A new hybrid produced by the Missouri Botanical Gardens. Its color may be described as a rare lavender-pink. The large flowers are carried well above the water and at times attain a size of more than 12 inches. The reddish-brown leaves are a beautiful addition. Without question the finest night bloomer. Price each\$2.00

Rubra Rosea

A native lily of India, producing rosy carmine flowers, 6 inches across. The flowers are star shaped and borne freely. Price each\$1.00

Sturtevant

A beautiful bright red flower, 8 to 10 inches across, requires a large planting box for roots with plenty cow manure mixed in to bring it to perfection. Price each\$1.50

Mystery

New night-blooming tropical lily, pure creamy white, produced through cross-pollenizing the H. C. Haarstick and the Juno. The formations of the flowers are exactly like the H. C. Haarstick except it is pure cream-white. The stamens are yellow except the base which is fire red. Very strong flowering night bloomer. Price each.....\$1.75

Omarana

Shaded pink in center and gradually diminishing in color until the tips are almost white. Flowers 6 inches across, a prolific bloomer. Price each.....\$1.00

Missouri

The best white night blooming tropical lily. Plant it in at least two cubic feet of rich soil to bring it to perfection. Price each\$2.50

Mystery Collection

1 Emily Grant Hutchings, 1 Mystery, 1 Sturtevant. All 3 for\$4.50

Egyptian Collection

1 Lotus Dentata, 1 Omarana, 1 Rubra Rosea. All three for..\$2.75

NOTE

Every pool should contain at least one of these varieties of lilies, as they bloom at nights when all other water lilies are closed; therefore, giving you flowers 24 hours of the day. We only list the finest new Hybrids produced.

Emily Grant Hutchings

A pink shaded night bloomer which produces immense large cup-shaped flowers. Price each\$2.00

Emily Grant Hutchings

Victoria Crouziana

Mr. Martin Vander Vaer, of New Haven, Conn., is well pleased with plants received from us

Special Collection Price
for this Crown Trio \$3.25

These three Water Lilies photographed in natural colors are set against a background of natural color photograph of Blue Star Water Lilies in one of our pools. The Blue Star carries its flowers on strong stems about 2 feet or more above the water surface. Tropical lilies are fragrant, large and make ideal cut flowers.

Please Notice

Most of our tropical lilies will bloom at least one week after shipping. Lots of them are shipped with flower buds so that you may expect an immediate effect. Too often customers insist on early shipments, which is a mistake based more on inexperience on the part of the water gardener. In the latitude of St. Louis, Tropical Lilies should never be planted before May 20. Allow us to ship your tropical lilies at proper planting time and you will never be disappointed with results.

THE FORMAL POOL

The larger formal pool can be planted with all of the various plants; the planting, however, is in keeping with the formality of the pool and garden in general on a uniform basis of expression. The planting scheme which we offer here is suitable for pools of 8 x 12 ft., 1 to 8 water lilies. A—umbrella palms and poppy. B—arrowhead and floating heart. C—sweetflag and lobelia. D—water taro and peacock hyacinth. E—water canna, parrotsfeather and paper plants. F—floating plants consisting of hyacinth, shell flower and waterfern. This collection with 8 lilies, your choice of any lilies valued not over \$2.00 each. Our collection No. 22 for only \$15.00

Water Poppy

Shallow Water Plants

Shallow water plants add a decided touch to the pool. A pool properly planted with these plants does not look so artificial. A number of plants also thrive near the pool where the soil gets moisture from the water in the pool. If the pool is built on higher ground, there are ornamental grasses and other garden plants that can be used for backgrounds or the ends of the pool to complete a most perfect picture.

Collection No. 18

For Large Pools

- 12 Iris Versicolor (hardy blue flowers)
- 12 Oxygen Plants (all hardy)
- 12 Floating Plants (different, not hardy)

Postpaid for \$3.00

Water Hyacinths

Besides Water Lilies there are smaller miniature plants that grow like lilies. Others float on the surface and some grow entirely submerged and produce oxygen. Include a few of these for practical purposes, as well as adding a little touch of variety.

Our water lilies in the natural pool at the Garden City Press, Gardenvale, Quebec, Canada

Edmonton, Alta., Canada.
Last fall I ordered some aquarium plants from your firm, and although they were several days on the way, they were received in excellent condition.
REG. HEATH.

Wichita Falls, Texas.
My order received and the plants were lovely.
MRS. L. M. HUGHER.

Vredenburgh, Ala.
Received my plants in good condition yesterday. Thank you for the free Lucidia.
ANNA H. VREDENBURGH.

Pittsburgh, Pa.
I received my water lilies in the best of condition. The other plants were also in good condition.
HERMAN KNELL.

SPECIAL COLLECTIONS OF HARDY WATER LILIES

**HARDY
WATER
LILIES**

Sunrise

Without question the finest hardy lily. The yellow flowers which are unusually large and cactus-shaped resemble a yellow dahlia. It is of a uniform yellow color and surpasses all other yellow water lilies. A great feature is the unusual fullness of the three rows of petals.

Price each.....\$1.50

**Floating Plants for the
Pool**

See our complete list of floating and aquatic plants which can be used for indoor aquarium or lily pools on pages 17 and 18.

Parrotsfeather

A beautiful floating plant with long trailing green foliage.

Each\$0.15
Per dozen 1.00

Water Hyacinth

The old fashioned favorite floating plant, native to Florida. Produces beautiful lilac-blue flowers.

Each\$0.10
Per dozen75

Salvinia

A beautiful small floating plant which turns red when exposed to strong sunlight.

Per portion \$0.25

Shell Flower (W. Lettuce) and
Water Hyacinth

Water Lettuce (Pistia Stratiotes)

The velvet green leaves form a rosette. They love plenty of heat and partial shade.

Each\$0.10
Per dozen75

Duck Weed

An old favorite. The small foliage is also greatly relished by goldfish and acts as a tonic.

Per portion.....\$0.25

**SHALLOW
WATER PLANTS**

**Water Nasturtium or Water
Cress**

Thrives in sun or shade; ideal near a cold spring. Edible, hardy. Rooted plants.

Each\$0.10
Per dozen 0.75

Water Hawthorne

A pretty plant similar to water lilies; produces oval-shaped leaves and clusters of white flowers. Very hardy.

Each.....\$0.40 3 for.....\$1.00

Water Chestnut

Trapa Natans, similar to the Water Snowflake, forming mottled floating leaves and small white flowers. The hard-shelled seeds are spiked and will produce new plants the following season. Shipped after May 15th.

Each..... \$0.40 3 for.....\$1.00

White Cedar Tubs

These white cedar tubs are 24 inches in diameter and 12 inches deep, and make ideal natural pools. Just dig a hole in the ground, and you are ready to plant your water garden.

Price of White Cedar Tubs, each\$2.25

Special Tub Collection

1 White Cedar Tub, 1 water lily (you may choose any one of the following varieties), Caerulea blue, Caerulea pink, Lotus Dentata white, Omarana pink, Rose Magnolia, Hoptacong white, Odorata white; 3 water hyacinths, 5 different aquatic plants and the following border plants: 3 Hemerocallis, 2 different ornamental grasses.

Complete Collection with tub\$4.60
Complete Collection without tub 2.35

NELUMBIUMS (Egyptian Lotus)

LOTUS

Nelumbiums

are hardy and they should be planted in one foot deep boxes filled with good rich dirt. The boxes should be about 2 feet square and the top of box about 6 inches under water.

Nelumbium Speciosum

Potted plants can be supplied.....
after June 1, each..... 1.50

Nelumbium Album Striatum

White flowers, each..... 1.50
Potted plants after June 1, each 2.00

Nelumbiums grow to about 4 feet high, flowers about 8 inches diameter and leaves from 10 to 18 inches across. They can not be shipped before May 20th.

Special Nelumbium Collection (Above 3)

One tuber of each variety for only\$3.25
One potted plant of each variety for only..... 4.50

Nelumbium Shiroman

A rare and beautiful, very fragrant double white lotus. On opening, the flowers are creamy with a greenish tint in some petals which color turns to pure white after being exposed to the mid-day sun. A strong growing plant, free flowering, the flowers frequently attaining a size of 12 inches diameter. Strong tubers. Each\$2.00

Nelumbium Roseum Plenum

A beautiful double flowering rose-colored lotus which often attain a size 12 inches across. Very fragrant globe-shaped flowers are produced in abundance during July and August. Price \$1.50

Lotus in My Pool

Photograph of Our Water Lotus

Our Lotus bed covers about three acres. It is best to plant Nelumbiums after the water has become warm, not before May 20, except in the south, when they may be planted after April 15. They should be planted in tubs 24 inches in diameter or boxes containing 12 inches of rich soil. The box should be 12 inches below water surface.

Cyperus Papyrus (Paper Plant)

Small plants, each.....\$0.35
Large clumps, each..... 1.00

Thalia divericata, left, and arundinaria tecta on the right, growing among Marliac Carne. This thalia is not hardy, but the exotic effect is well worth its low price of 75c. Arundinaria plants are very hardy and belong to the hardy bamboo varieties. Priced at 50c each.

Collection No. 19
Japanese Water Taro

Japanese taros, Umbrella palms, Water hyacinths, Egyptian paper plants, combined with the beautiful Mrs. Ward (Rose Star) Water lily, make an ideal combination for any pool. We offer this whole collection, one of each, for only \$2.75.

These plants must be planted after June 1 when all danger of frost is past.

Per dozen.....\$0.50 Per 100.....\$2.00

This photograph was taken by Mr. William G. Schumm, La Porte, Indiana. Mr. Schumm is well pleased with the Egyptian Lotus he received from us, and he advises that he left the plant out in the water tub all winter without any protection.

HEMEROCALIS FULVA

POOL PAINTS AND FERTILIZERS

Magic Water Lily Food

Beldt's Magic Water Lily Fertilizer and Plant Food

Has been perfected after years of experimenting. Magic does not foul or sour the water in your pool and leaves it absolutely free of foreign colors. In our experimental pools Magic Water Lily Food proved that flowers will double in size and that especially newly planted water lilies and all other aquatic plants will make as much growth in one month as they would in two months if planted in ordinary soil. Use 1 pint of Magic Water Lily Food to mix with 1½ bushels of soil. Complete directions with every carton.

1 pint cartons, each.....\$0.35
5 lb. bags, each..... 1.05

Redwood Water Lily Boxes

These boxes are shipped knocked down and can be nailed together by anyone in a few minutes. They are cut from durable California Redwood and will last a life time under water.

These boxes also make wonderful boxes for propagating white worms. Prices do not include postage or expressage.

Size	Deep	Long	Wide	Price Each
No. 1	8"	10"	10"	\$1.00
No. 2	10"	18"	18"	2.00
No. 3	15"	22"	22"	3.25

Asphaltum Enamel

A new pool does not have to be seasoned if the pool is painted one coat of asphaltum enamel. The concrete walls must be perfectly dry when applying this enamel. Just give it one good coating, let it dry 24 hours and it is ready to be filled. Black asphaltum enamel also has the advantage of keeping algae from forming on the walls. We can supply this enamel in black, green and blue. One gallon of Asphaltum enamel will cover a surface of about 150 sq. ft., all depending on the smoothness of the concrete finish.

Per quart, Black.....\$0.35
Per gallon, Black..... 1.25
In 5-gallon cans, Black..... 5.60
Per gallon, Green or Blue..... 4.00
Per quart, Blue and Green..... 1.20

We do not pay expressage on pool paints.

Wooden Water Troughs

These Redwood troughs are ideal for putting goldfish eggs in to hatch or to bury in the ground for a small pool. They are coated on the inside with asphaltum so that they are absolutely waterproof and do not require seasoning.

These troughs are also good for over-wintering goldfish and plants in the cellar.

Size 5 ft. long, 1 ft. high,
2 ft. wide.
Price Each \$6.00
Made from 2-inch thick Redwood.

Colored Lily Pool Paint

We highly recommend Sealment Water Proof Paint especially prepared for cement walls and lily pools. After testing many materials manufactured for this use we selected Sealment as the best. If Sealment is mixed properly and applied according to complete directions which are furnished with every can, it will last as long as the pool itself and forms a part of the pool and not merely a surface coating. It is ideal for stopping leaks in pools. Sealment contains no poisonous chemicals, however, on account of lime content, pool must be seasoned with change of water before placing fish in same. Sealment Water Proof Pool Paints can be supplied in following colors:

White, Blue, Green

Price per 5 lb. can for all colors except Green.....\$2.00
Price per 5 lb. can, Green.... 2.50

Directions

Five lbs. of Sealment Pool Paint will cover 50 square feet. Sold only in 5 lb. cans and we can not supply this in any other quantity. You will find complete directions for use with every can.

Hopkinsville, Ky.

POOL OF MRS. GUY GLOVES,
208 MITCHELL STREET, LONGVIEW, TEX.

This photograph of Water Taros in our greenhouses gives you an idea of the striking effects that can be secured in planting these beautiful bog plants, either in the center or near the edge of pools. The cost of these plants is so small considering the beautiful effects that can be secured if you include them in your planting arrangements. By all means don't fail to get at least one of each. Listed on page 16.

Practical Plants Near the Pool
Chinese Hibiscus

(Aurantiacus and carmiratus) —Red and pink and white. Three wonderfully improved varieties, producing flowers about 10 inches across. Very hardy and equally at home in wet or dry soil.
Each....\$0.25 Per dozen....\$2.50

New Hardy Yellow Chinese Hibiscus

Each.....\$0.40 3 for.....\$1.00

BOG PLANTS FOR THE EDGE OF THE LILY POOL

WATER TARO

These plants grow best in shallow water near the edge of pool. If planted in boxes or flower pots in concrete pools, boxes should be raised within 2 to 4 inches below water surface.

Cyperus Papyrus

(Paper plant), grows from 4 to 6 feet high, produces a tuft, a top resembling a feather duster. Not hardy.

Each\$0.35

Parrot Feather

The long trailing stems produce a beautiful light green foliage, good for the ends of pools. Hardy.

Each.....\$0.15 Per dozen.....\$1.00

Giant Arrowhead

(Sagittaria sagittifolia), the large arrow shaped leaves stand two feet above water. The white flowers are carried on long center spike. Hardy.

Each.....\$0.20 3 for.....\$0.60

Cat-tail

(Typha Angustifolia), a well-known native swamp plant.

Each.....\$0.20 3 for.....\$0.60

Umbrella Palm

(Cyperus alternifolius), a well-known native swamp plant.

Each.....\$0.25 Extra large.....\$0.50

All Plants on this Page for Shallow Water

Double Flowering Arrowheads

They develop beautiful spikes of double flowers which are white and are very strong growers. Very fragrant. Hardy.

Each.....\$0.50 3 for.....\$1.25

Variegated Sweet Flag

(Acorus calamus variegatus). Hardy.

Each.....\$0.20 3 for.....\$0.50

Four-leaved Water Clover

(Marsilia quadrifolia), a shallow water plant producing leaves resembling clover. Grows about 6 inches tall. Hardy.

Potted plants ea., \$0.20; 3 for \$0.50

Butterfly Lily

(Hedychium coronarium), flowers white and very fragrant. Does well in outdoor pools when planted in 3 inches of water. Leaves like canna, grows 2 feet tall. Very ornamental. Not hardy.

Each.....\$0.35 3 for.....\$1.00

Green Taro

The leaves and stems are light green. A good grower and very ornamental. Taros make nice house plants for the window and do well over the winter. They are not hardy.

Each.....\$0.30 3 for.....\$0.75

Rosa Palustris

Native Carolina swamp rose, dark green foliage, flowers 2½ inches, deep pink. 3 to 4 feet high. Does well near the edge of natural pools. In concrete tanks should be planted in large pots or boxes 1 foot square and the box should be half submerged. Hardy.

Each.....\$0.50 3 for.....\$1.25

Yellow Flag

(Iris pseudacorus), very similar to blue flag, with large yellow flowers. Hardy.

Each.....\$0.15 3 for.....\$0.40

New Red Water Iris

A beautiful tall growing iris; flowers of deep red color; 24 inches. Hardy.

Each.....\$0.40 3 for.....\$1.00

Pickrel Rush

(Pontederia Cordata), this canna-like plant with arrow shaped leaves grows about 2 feet high and produces long spikes of blue flowers. Hardy.

Each.....\$0.25 3 for.....\$0.60

Spiral Palm

Dark green foliage, 2½ feet, similar to Paper Plant. Not hardy.

Each.....\$0.25 3 for.....\$0.60

Graceful Cat-tail

(T. Angustifolia), a dwarf cat-tail, 2 feet. Hardy.

Each.....\$0.25 3 for.....\$0.65

Bullrush

Dark green round spikes forming a tuft. Hardy.

Each\$0.25

Lobelia Cardinalis

Produces a long spike of fire red flowers; grows 2 feet tall. Very hardy.

Each.....\$0.25 3 for.....\$0.60

Primrose Willow

(J. Longifolia), a bushy plant producing pink blossoms, 2 feet. Hardy.

Each.....\$0.35 3 for.....\$1.00

Primrose Creeper

A quick growing trailing aquatic with waxy deep green leaves, yellow flowers. Hardy.

Each.....\$0.25 3 for.....\$0.60

Water Poppy

This nymphaea like aquatic produces a continuous mass of yellow flowers, the leaves are deep green and very smooth and float on the surface. Not hardy.

Each.....\$0.15 3 for.....\$0.40

A low growing plant with broad leaves, 1 foot. Hardy.

Each.....\$0.25 3 for.....\$0.60

Water Snowflake

A lily-like plant that produces an abundance of tiny white flowers which grow from the centers of leaves. Hardy.

Each.....\$0.35 3 for.....\$1.00

Thalia Dealbata

A hardy bogplant with stately canna-like leaves. Grows 2 feet high with purple flowers. Hardy.

Each\$0.25

Thalia Divaricata

A newer variety, grows 5 feet high, producing large clusters of purple flowers. Not hardy.

Each\$0.75

Floating Heart

(Nymphoides Peltatum), grows like a miniature water lily and produces an abundance of small yellow lacy flowers about 1 inch across. Hardy.

Each.....\$0.25 Per dozen.....\$2.00

White Water Iris

Native to Louisiana. Flowers snow white, 24 inches tall. Hardy.

Each.....\$0.40 3 for.....\$1.00

Blue Flag

(Iris versicolor), a tall growing iris, producing beautiful blue flowers, the sword-shaped leaves resembling the Japanese iris. Hardy.

Each.....\$0.20 3 for.....\$0.50

Arundinaria Tecta

A graceful hardy bamboo. A strong grower producing a beautiful tuft or seed pod which turns to a bright golden color in the late fall. A beautiful late fall effect when everything else about the pool has gone to rest. Hardy.

Each.....\$0.50 3 for.....\$1.25

Canna Flacidda

An aquatic canna producing yellow flowers; this plant grows about 2 feet high and does well in shallow water. Not hardy.

Each.....\$0.25 3 for.....\$0.60

Lizard's Tail

A pretty plant for shallow water, producing fragrant white flowers, grows 2½ feet high with heart shaped leaves. Hardy.

Each.....\$0.20 3 for.....\$0.60

Imperial Taro

The leaves are light green and beautifully blotched in dark violet colors; grows about 2 feet high.

Each.....\$0.50 3 for.....\$1.25

Violet Stemmed Taro

The deep green leaves are pronounced through the addition of dark red ribs, grows about 2 feet high. One of the best.

Each.....\$0.50 3 for.....\$1.25

"LOTUS IN MY POOL"

This photograph was sent in by Mr. Sam Caldwell, of Nashville, Tenn. For larger pools having enough space for the planting of lotus (a box 24 inches square and 12 inches deep is sufficient), they can be highly recommended. They are very hardy and multiply rapidly. While many plants do not bloom the first year, quite often plants will make several flowers the first season.

This lovely pool belongs to Mrs. Kirstine Parker, Tremonton, Utah. Mrs. Parker was more than satisfied with plants received from us.

Mrs. Clifford Nordberg, Abnandale, Minn., sends this picture of her pool and writes:

Dear Sir: My first pool and lilies have been such a success that I feel I must share a little of my joy with you, since my lilies came from your firm. The lilies were just beautiful and bloomed all summer. My Blue Star had as many as three flowers at once and at least four other buds ready to open. Mrs. Sawyer was also beautiful and bloomed all summer.

Sagittaria sinensis Sagittaria natans Sagittaria subulata Giant Anacharis (Elodea) Valissneria Cabomba Miriophyllum

Valissneria spiralis
The Italian variety, common name eel grass. The most popular plant for the tropical fish aquarium.
Each.....\$0.05 6 for.....\$0.20
Dozen.....\$0.35
50 for.....\$1.25 100 for.....\$2.25

Cork Screw Valissneria
Similar to the Italian Valissneria except that the leaves are twisted somewhat similar to a spiral. A novelty.
Each.....\$0.05 6 for.....\$0.20
Dozen.....\$0.35

Sagittaria Lorata
A fountain shaped Sagittaria with rigid pointed leaves 1/2 inch wide. Grows about 6 inches tall.
Each.....\$0.15 6 for.....\$0.75

Sagittaria sinensis
A fine plant for both gold and tropical fish.
Each.....\$0.10 6 for.....\$0.50
Dozen.....\$0.90

Sagittaria natans
A good plant for tropical and goldfish tanks.
Each.....\$0.10 6 for.....\$0.50
Dozen.....\$0.90

Sagittaria subulata
One of the best plants for tropical aquarium; grows about 6 inches high.
3 for.....\$0.10 50 for.....\$1.25
Dozen.....\$0.35

Giant Valissneria
Grows from 24 to 36 inches long, for large tanks.
Each.....\$0.10 6 for.....\$0.50
Dozen.....\$0.90

Giant Anacharis
One of the best oxygen plants for gold and tropical fish.
Per bunch \$0.15 6 bunches \$0.75

Cabomba or Washington grass
One of the prettiest of water plants. Does well in gold and tropical fish aquariums.
Per bunch \$0.15 6 bunches \$0.75

Red cabomba
A similar variety, except foliage is light red instead of green.
Per bunch.....\$0.20 3 for.....\$0.50

Miriophyllum
Common name Millfoil. A nice green plant, ideal for spawning both gold and tropical fish.
Per bunch.....\$0.15 6 for.....\$0.75

Red miriophyllum
Same as green, only the color is light red.
Per bunch.....\$0.20 3 for.....\$0.50

Ludwigia
One of the best liked ornamental aquarium plants. Easily rooted from cuttings.
Per bunch.....\$0.15 6 for.....\$0.75

Cryptecoryne willisi
A very popular and ornamental plant in tropical and goldfish tanks.
Each.....\$0.10 3 for.....\$0.25
Dozen.....\$0.75

Cryptecoryne cordatum
A slightly wider leaved plant than willisi, top of leaf a beautiful shade of green, bottom of leaf red.
Each.....\$0.20 3 for.....\$0.50
Dozen.....\$1.50

Cryptecoryne griffithi
Broad leaved with nice variation of darker shades in leaves. Considered the best of all cryptecorynes.
Each.....\$0.25 3 for.....\$0.60

Cryptecoryne beckettii
A dwarf variety of light green foliage.
Each.....\$0.20 3 for.....\$0.60
Dozen.....\$1.50

Fontinalis gracillis
A beautiful green mossy foliage; plants grow in clusters at the bottom. Nice for spawning.
Per portion.....\$0.35

Potamogeton densus
A fine bunchy growing plant which floats near the surface affording protection to young fish.
Per portion.....\$0.25

Bacoba
A green foliage plant, very similar to Ludwigia, except that the leaves are more fleshy and rounded.
Per bunch.....\$0.15 3 for.....\$0.40

Ceterophyllum
Common name, horn wort or Marestail. It is easily grown and provides a fair protection to newly born fish.
Per bunch.....\$0.15 6 for.....\$0.75

Cellophane plant
A newer aquatic with light green nearly transparent leaves.
Each.....\$0.35 3 for.....\$0.90

Nephtytus liberica
Aquatic Arrowhead. A nice plant with arrow shaped leaves which prefer to grow above water.
Each.....\$0.25 3 for.....\$0.60

Madagascar Dwarf Aquarium lily
Makes nice blue flowers above water. For tanks over 10-gallon capacity. Must be grown in pot with soil.
Each\$1.00

Ludwigia Ceterophyllum (hornwort) Cellophane Plant Cryptecoryne willisi Cryptecoryne cordatum Cryptecoryne Griffithi

NEW AND RARE VARIETIES OF GREENHOUSE-GROWN AQUARIUM PLANTS

TRY BELDT'S GREENHOUSE-GROWN PLANTS IN YOUR AQUARIUM

Water Sprite
A fern-like plant of light green foliage which is of recent introduction and has made many friends.
Each\$0.25 3 for.....\$0.60

Dwarf anacharis
A dwarf variety of elodea especially suited to smaller tanks but equally effective in larger aquariums.
Per bunch, \$0.15. 3 for \$0.40

Southern spatterdock
A beautiful foliage plant which has a delicate light green color.
Each.....\$0.20 3 for.....\$0.50

Round leaf spatterdock
A smaller variety with round leaves.
Each.....\$0.15 3 for.....\$0.40
Dozen.....\$1.25

Hairgrass
A well-liked small dense growing grass which forms small leaves about 4 inches long.
Per portion.....\$0.25

Banana plant
A novelty plant which is very popular. Grows from the seeds of the snowflake lily, the seed formation growth resembling a miniature bunch of bananas from which the leaves sprout.
Each.....\$0.15 4 for.....\$0.50

Echinoderus Radicans
Formerly known as sagittaria guyanensis. Broad green leaves, 5 inches long, are produced from a single root growth.
Each\$0.50

Water Snowflake
A lily-like aquatic plant; the leaves float on the water surface; requires sufficient sunlight.
Each\$0.35

Aponogeton fenestralis
Madagascar lace plant, the finest and rarest of all aquatic plants. The thick leaves form a lacy perforated growth.
Each\$10.00

Aponogeton Ulvaceum
A beautiful aquatic plant of recent introduction belonging to the Madagascar Lace Leaf family. Beautiful light green leaves about 5 inches long, forming a rosette.
Each\$1.50

Aponogeton Crispum
Also of recent introduction, produces medium green, curly edged leaves, all of which grow from a center root. A very attractive plant.
Each\$1.00

Under Water Palm
An aquatic plant which produces palm-shaped spikes which grow similar to the Umbrella palm.
Per portion.....\$0.25

Amazon Sword Plant
The foliage is similar to sagittaria sinensis only stronger and the growth is more symmetrical and many more leaves are produced.
Each.....\$0.35 3 for.....\$1.00

Brazilian Under Water Fern
This plant of recent introduction produces waxy green leaves about 4 inches long.
Each\$0.50

Potomogeton Crispus
A plant similar in growth to Ludwigia, except the leaves are long, much like cryptocoryne willisi but the plants grow more compact.
Per bunch....\$0.15 3 for....\$0.40

Fanciers' Special Collections

Collection No. 1
A 5-gallon aquarium collection of assorted plants, postpaid \$0.65

Collection No. 2
A fine collection of aquarium plants for 10-gallon aquarium.
Postpaid\$1.25

BOG PLANTS
Plants which grow above the water, but roots must be submerged in flower pots. All suitable for aquariums indoors.

Umbrella Palm
The most popular of these varieties.
Each\$0.25

Spiral Palm
Similar to Umbrella Palm, except that the leaves grow in perfect spiral shape.
Each\$0.25

Hedychium coronarium
A beautiful foliage plant similar to water canna; easily grown if pot is kept in water. This feature applies to all of these bog plants. Try some of them.
Each.....\$0.35 3 for.....\$1.00

Supreme Collection
Three Cryptecoryne willisi, 3 Cryptecoryne cordatum, 3 Cryptecoryne griffithi, 2 Japanese Spatterdock, \$1.50.

Rarity Collection
One each of following plants: Madagascar Dwarf Aquarium Lily, Water Violet, Australian Aquatic Four-leaf Clover, Egyptian Dwarf Red Leaf Under Water Lily, one Cryptecoryne griffithi. Special for.....\$2.00

Fanciers' Special
Fanciers, get our nice selection of plants to balance 15-gallon aquariums: Vallisneria, Elodea, Round Leaf Japanese Spatterdock, Sagittaria, etc. Enough plants for ornamental, and practical planting of your aquarium. Including one Cryptecoryne griffithi, free. For only \$1.25, postpaid.

African four leaf clover
A nice aquatic plant resembling four leaf clover. Each leaf is produced on a single stem.
Each.....\$0.20 3 for.....\$0.50

Water violet
A plant similar to Spatterdock, except that the oblong leaves are produced on longer stems.
Each.....\$0.20 3 for.....\$0.50

FLOATING PLANTS

Water Lettuce
A floating plant requiring several hours' direct sunlight daily to bring to perfection.
Each.....\$0.10 3 for.....\$0.25

Floating Fern
The most popular floating plant does not require very much sunlight. Ideal for baby fish to hide over partly submerged leaves; young plants grow right from the leaves.
Each.....\$0.10 6 for.....\$0.40
Dozen.....\$0.75

Salvinia
Small leaves, 1/2 inch across, are formed in clusters.
Per portion.....\$0.35

Duck Weed
A well-known small floating plant.
Per portion.....\$0.25

Water Hyacinth
A floating plant which is very popular for spawning, as the roots, which are dense and bushy, afford a lot of protection to the eggs. Used extensively in goldfish pools and for spawning tropicals.
Each.....\$0.10 Dozen.....\$0.75

Parrotsfeather
A trailing plant of light green foliage which grows above water level.
Per bunch....\$0.10 Dozen....\$1.00

Floating Plant Collection
Six varieties. \$1.00 postpaid.

Water poppy
A well-liked plant. The waxy green leaves reach the water surface and give a decided lily-like effect.
Each.....\$0.15 6 for.....\$0.75

Utricularia minor
Common name, Bladderwort. A dense growing floating plant, ideal for breeding purpose.
Per portion.....\$0.35

Crystalwort
Another well-liked floating plant with a light green foliage of fine crystal-like threads.
Per portion.....\$0.35

Special price, including shipping can..... \$6.00

Mound City, Kan.

I still have the fish I purchased from you five years ago and I am very proud of them. Each year I have raised some young ones.

MRS. CHAS. E. CLARK.

Miles City, Mont.

About six years ago I received a shipment of fish from your aquarium; most of these fish are still living. They have increased a great deal both in number and size. The pleasure we have received from them cannot be counted in dollars and cents.

MRS. JOHN KUILMAN.

They are known also as Medaka. The color is light pale yellow. They are peaceful and best suited for the happy family aquarium. Very hardy and can be kept with goldfish.
Per pair.....\$0.50 Per dozen.....\$2.50

Read These Directions When Ordering Goldfish

Goldfish are shipped via express. We ship in small cans up to 24 of the smaller sizes. These small cans are not returnable and 35c should be added to your order for this can. We ship 50 fish in a 5-gallon shipping can. These cans cost 60c each and are not returnable.

Orders calling for more than 50 fish are best shipped in large galvanized goldfish cans, holding 10 gallons of water. A \$3.00 deposit is required on these cans, which must be returned, 20c pre-paid, from anywhere in the United States.

We guarantee live delivery on all goldfish. If shipment should arrive in bad order, notify claim department at once, get an inspection report and mail this to us together with the empty can and we will replace lost fish, express charges prepaid. If, however, the loss constitutes a value below 50c, then keep the report, send it to your local claim department for collection of value of loss. Kindly understand that unless we make a minimum provision so low as a 50c loss, it is merely to prevent claims that may amount to only 10c and the time and postage consumed in that case would be many times the actual value of loss.

SCAVENGERS FOR AQUARIUMS AND POOLS

Do not try to keep an aquarium or a pool without the proper kind of scavengers. They are very important in keeping an aquarium or pool clean. Clams should never be used in an aquarium. They should only be used in pools, as the average aquarium is much too small. Figure at least one snail to the gallon of water when keeping an aquarium, and if you use the large Japanese snails, use at least a dozen snails for each 50 gallons of water in the pool, and figure one Weatherfish for each 10 gallons of water in the aquarium besides the snails.

Water Newts or Salamanders are very interesting, but have no scavenger value. Tadpoles make very good scavengers in both pools and aquariums. Scavengers consume very little oxygen and, therefore, will not overcrowd the aquarium.

Add 15c postage for snail orders amounting to less than \$1.00.

No. 1—Red Ramshorn Snail

ADMISSION BY CARD ONLY

View of one of our many breeding houses at our hatchery located 12 miles west of St. Louis. You are cordially invited to visit our hatchery, which is located on a 40-acre tract of land one mile north and about one mile west of the St. Louis Airport. Over 80 ponds outside present a mass of blossoms of various colors of water lilies during the summer months.

Our hatchery is closed Sundays and Holidays.

How We Ship Tropical Fish

During the summer months tropical fish are shipped in plain metal cans. Add 35c to your order. If the weather is cold and during winter months we pack these cans especially protected against cold weather in a special insulated carton. During cold weather add 25c extra for winter packing or a total of 60c for the shipping container. These containers are not returnable, but as they are very light in weight, they reduce express charges.

We also ship in special thermos shipping cans during cold weather. These cans are returnable and a \$3.00 deposit required on these is refunded if the container is returned within seven days.

A rental charge of 25c per week is made against the deposit on special thermos cans held longer than one week after receipt of shipment. We guarantee live delivery, but do not assume responsibilities for losses after shipment is received in good order. If a shipment arrives in bad order and there should be any dead fish in the can, call the Railway Express Agency Claim Department same day as shipment is received. Get an inspection report and mail this to us.

Be sure to take the water temperature during winter months and have this recorded on this inspection report. We will then replace the fish which were lost express charges prepaid. We cannot consider claims unless the loss amounts to \$1.00 or more. If losses are less than \$1.00, claim should be filed against carriers by you.

Special Panchax Collection

(Egg Laying Killifish)

Here is a collection of extreme interest for the advanced aquarist as well as the novice. Killifish are quiet and will, some times for several minutes, stand in the same position without showing a sign of life. When food is thrown into the aquarium they dart quickly and snap the food. They can jump after the food high out of the water. The aquarium should be covered with glass.

INTERESTING BOOKS FOR THE FISH FANCIER

"Exotic Aquarium Fishes."

By WILLIAM T. INNES

This 460-page book with 41 color plates and 290 black and white illustrations is one that everyone interested in Aquarium Fishes should own. It contains only such fishes that have actually been imported, giving the popular name (if any), the scientific name, its pronunciation and meaning, the native habitat and a key reference to a world map, which is printed on the fly-leaf. There are also 7 maps which show the world distribution of the 7 most important families of Aquarium Fish; 78 pages are devoted to Aquarium Management, Plants, Diseases, Enemies, etc. There are also sections on Wholesale Breeding, Collection and Transportation, Miscellaneous Information, and Rules for Fish and Aquarium Competition.

Price Postpaid \$5.00

"Goldfish and Their Care"

If you wish to raise your own daphnia, get a can of live daphnia and one package of our Infusoria Powder, which is also used for raising daphnia. Complete directions with every package. Live daphnia, including shipping can\$1.00

Infusoria powder 35c postpaid.

Brine Shrimp Eggs

The eggs will keep indefinitely. Young hatch in 24 hours, and make ideal live food for tropicals. Full directions with each package.

Per carton Postpaid 75 Cents

Tubifex Worms

A small reddish colored worm, similar to white worms. They will live under water for months, making it possible to feed your fish enough for several days if you are away. Per portion,

Postpaid 75 Cents

Infusoria Cultures

Various microscopic life forms the foundation of water life. Without these creatures there would hardly be a living thing in water. Infusoria is used for feeding tiny baby egg-layers of all tropical, goldfish and most all fresh water game fish subsist on this microscopic life during the first few weeks of their existence. We can supply following cultures: paramecium, philodino, Euglena, and monostyla. These cultures cannot be shipped in zero weather on account of water freezing. Each culture is sent postpaid for

\$1.00

SILVER BRAND FISH FOODS

A good fishfood is essential to keep the fish in good health. Our "Silver Brand" fishfoods are the finest scientifically prepared foods for all aquarium fishes. We have years of experience breeding tropical and goldfish, and inferior foods result mostly in sick fish, lost colors and run down conditions. Many fanciers are not aware of the fact that a poor fishfood results in diseases which no remedy will cure, because the fish are too run down to respond to any treatment. In many cases only a good fishfood is all that is required to bring them back to health instead of a lot of chemical preparations. Request your dealer to stock our foods and do not accept inferior brands made by people who never owned a fish in their lives. All of our high grade fishfoods, put up in glass jars to keep them fresh and moist, do not contain any kind of filler such as meal or flour to produce quantity instead of quality. Most of these fillers produce constipation and the fish are soon run down and subject to all kinds of diseases. Stop using them and you will have better and healthier fish.

BELDT'S RELIABLE REMEDIES

Magic Infusoria Powder

Size of Package, 4x2½ Inches

Beldt's Magic Infusoria Powder

One eight-ounce box is enough to produce fifty gallons of infusoria. When breeding egg-laying tropicals or goldfish, the young, after they are able to swim, must be fed on infusoria. All young live bearing fish can be fed on infusoria for about ten days. This powder, which is guaranteed to produce the best infusoria culture, should be on hand. In case you do have some egg-layers to spawn, you will need these small infusoria microbes for food.

Price per can.....\$0.40

Beldt's Fungus and Ich Remedy

It knocks off the spots.

This is the most effective remedy for fungus, tail rot, and especially ichthyophthirius on tropical fish. Symptoms: Folded fins, fish wiggle, and seem to be unable to swim, scratch themselves on sand. Tropical fish have tiny white spots on bodies—cotton-like growth. This remedy should be on hand as these diseases are contagious and spread rapidly. Complete directions with every bottle.

Price, 1 oz. Bottle, \$0.30, postpaid.
3 for \$0.75

Maplewood, Mo.

I received the Fungus remedy I ordered and at once put it to work on some baby fish that had tail rot. In four days they were well. I can highly recommend your fungus remedy to every fish enthusiast.

Postpaid, \$0.50

South Byron, N. Y.

I have had very fine results with your Gold and Tropical Fish Tonic in starting new aquariums and keeping goldfish in my pool healthy during the winter.

MRS. EVA BOATFIELD.

AQUARIUM MANAGEMENT

Aquarium Management

Never use gravel or too many shells for the bottom of an aquarium. Food and refuse will accumulate among them, because fish and scavengers have no access to it. It will cause the water to spoil and roots of plants to get black, and acid conditions resulting in the death of your pets. Use only clean river sand, one that is not too fine, yet not too coarse. Never place the fish in fresh water, it contains too much oxygen, also too many chemicals. After aging water for about a week, it is much safer than fresh water. A positive prevention against disease is to heat the water and let it age for about a week. All danger of ich can in this way be eliminated. Never keep the water in any kind of metal containers. Green water is caused by excessive sunlight or insufficient plant life. Two or three hours of direct sunlight per day is not too much. If the aquarium gets green it will clear up if covered with brown paper. Also floating plants help keep it clear. If you can not provide an eastern or southern exposure get an electric reflector and let it burn at least two hours in the evening; it stimulates plant growth. Bad smelling water is

the result of either too much food or the wrong kind. Do not underestimate the value of sufficient plants and some scavengers. When cleaning your aquarium try to save as much of the old water as possible. Strain it through a towel and use it over as it is much safer than too much new water. As a rule one-third new water never gives any ill effects even if it has not been aged, just so it is tempered properly. Occasionally syphon off the dirt on the bottom and replace it with fresh tempered water; this is more beneficial than harmful. It is best to keep two aquariums, one to use for quarantine purposes of newly purchased fish. Observe them for a week before placing them with your valued stock. When you get fish via express save all the water in which they come, and add old water to same. This will minimize the difference in chemical contents of the water. It also is a good precaution to add two drops of fungus remedy to the water. Good, clear water in an aquarium is very essential. It contains more oxygen and creates a better plant life. Plants absorb the impurities which create carbonic acid gas and throw off oxygen which the fish require. Therefore, a balanced condition can be created by

keeping a certain amount of plants and fish life in an aquarium, and such an aquarium does not have to be cleaned more often than once in six months to one year. Science has made aquarium keeping extremely simple. Automatically controlled aquarium heaters are perhaps the greatest benefit ever devised for the tropical aquarium. The proper temperature is from 72 to 80 degrees F. Chemical aquarium testing kits will help you determine the exact acid or alkaline conditions and the chemicals coming with these kits help you to neutralize the water. Unless one intends to go in for breeding, scientifically prepared foods usually cover a most complete diet. Medicated aquarium balls will help to prevent acid conditions. Feed as much food as the fish will consume in about thirty minutes. Use the dip tube to remove excess foods and refuse from the bottom occasionally. The glass may be kept clean with fine steel wool; small pieces of steel wool which may drop in the water are not injurious, but rather beneficial. Air pumps are a great aid for large community tanks. Many more fish may be kept in an artificially aerated tank than if you only depend on the function of plant life. Glass feeding rings

are more necessary than most fanciers realize. How would you like your dinner spread all over the table? Feeding rings help keep the aquarium clean. Glass covers are necessary on all heated aquariums, they help to retain the heat; many tropicals also like to jump out. A few bushy floating plants such as Utricularia minor (Bladderwort) or potamogeton densus in which newly born fish may hide prove one of the best paying investments. Do not be pennywise and pound foolish. Before investing a dime in fish, secure the proper equipment to keep them. Too many beginners make the mistake and invest \$3.00 in a cheap tank and heater and seven dollars in fish. If this investment were reversed, you would profit in the end. Do not try to start the fish hobby without first reading a reliable book on this subject. Investigate before you invest.

Demand Our Goods From Your Local Dealer

Many dealers carry our supplies, such as foods, aquariums, fish, plants, and supplies. If your dealer does not stock them, demand them, and he will be only too glad to stock them for you. We shall be glad to have your dealer's name and address.

MINERAL BLOSSOMS

Meramec Sand for Aquariums

It is very important to use the right kind of sand for the bottom of an aquarium. Meramec sand answers this purpose. White sand packs too tight and does not allow the roots of plants to grow right; on the other hand, if sand is too coarse, fishfood and refuse collect among same, causing water to decompose and get cloudy. Meramec sand is put up in the following size packages:

Size	Each
10-lb. sack	\$0.50
25-lb. sack	.75
50-lb. sack	1.20
100 lb. sack	2.00

Prices F. O. B. St. Louis

We can ship Meramec sand via freight only if freight charges are remitted with order, as we cannot make C. O. D. charges for freight; however, we can ship Meramec sand via express, express charges collect.

Ozark Coral

Ozark Coral is of volcanic origin and composed mostly of molten sand and tuff. The hollow spaces are filled with ocre; it is the removal of this ocre that gives the rock its natural and beautiful forms. True lovers of nature hesitate to use castles on account of being too artificial. Ozark Coral gives the desired natural effect in ornamentation.

AQUARIUM HEATERS AND REFLECTORS

Top Light Aquarium Reflector

Fits Any Aquarium Made from Metal Angles

If turned on during the evening hours the light stimulates plant growth.

Single bulb—9½ inches long. Price.....\$1.25
 Two bulb—16 inches long. Price..... 2.00

These reflectors have universal hangers fitting any aquarium. They are furnished complete with bulbs, hangers and extension cords. The bulbs supplied with these outfits are regular 5-inch long clear Japanese show case bulbs. If American-made bulbs are desired add 20c for 9½-inch reflector and 40c for 16-inch reflector.

Supreme Aquarium Reflector

Will fit on any aquarium. Size 8½ inches long, 2½ inches deep, 3 inches wide. It is so constructed that one rubber hanger can be moved so that it may be used on either end of the aquarium or fastened against the back. They are furnished complete as illustrated with extension cord and 5-inch show case bulb.

Price each, with 5-inch General Electric Show Case Bulbs.....\$1.65
 3 for 4.50

Fluorescent Light

These tubular bulbs are coated inside with fluorescent powders which glow when stimulated by short wave ultra-violet light. This is an ideal aquarium reflector as it brings out all of the beautiful colors and creates a very good plant growth. It is the finest substitution for sunlight. Ideal for dealer's display tanks and home aquariums. Why not enjoy your fish aquarium at night?

Please note that a 15-watt fluorescent lamp produces about 4 times as much light as a regular light bulb.

Chrome Aluminum on

Length	Wattage	finish	brass
20 in.	15	\$8.60	12.50
26 in.	20	9.80	14.00
38 in.	30	12.00	18.00

These prices include of course the bulb and extension cord, also auxiliary equipment for use on 60-cycle alternating current. Special longer sizes can be made to order. They are also made to special order for direct current.

No. 4

Special Chrome Heater

These heaters are 9¼ inches long and are supplied complete with hanger and extension cord. Can be had in 40-watt for 12-15 gallon tanks; 60-watt for 16 to 20-gallon tanks; 80-watt for 21 to 35-gallon tanks; 100-watt for 35 to 50-gallon tanks. Do not fail to state capacity when ordering.

Price each.....\$1.75

No. 3

Automatic Chrome Heater

The heating element as well as the thermostatic control are housed in chromium plated brass tubing 9¾ inches long. Nothing to break. 100-watt capacity. For aquariums from 5 to 25-gallon capacity.

Price each.....\$3.75

718 Center St.,
 Cairo, Ill.

The aquarium purchased from you while in your city is really worth more than its price.

VIVIAN WALKER.

The aquarium arrived in good condition.

J. ARTHUR WALLIZE.

Deep Sea Coral

Bring a bit of the South Seas into your aquarium. This coral is bleached white and can be supplied in branches of various sizes priced 25c, 35c, 50c, 75c and \$1.00 each according to sizes and beauty of formations.

Chromalox Aquarium Heater

110-120 Volts

This is a heater for large aquariums. Has an overall length of 12 inches; width 2½ inches. Will maintain a temperature of 75° F. in aquariums up to 50 gallons.

Three paramount virtues of the Chromalox heater: Sensitive, non-radio interfering, and sealed thermostat. Heavy brass tube chromium plated. Chromalox element. Water-proof mounting to keep drip water from getting into mechanism. The mounting must be kept above water level. Guaranteed for one year.

Price each .. \$6.50

GUARANTEED ELECTRIC AQUARIUM HEATERS

NO. 1 HEATER
PRICE \$5.75

No. 1. Automatic with pilot light indicator has a double socket, and two heaters can be used thermostatically for two different aquariums if desired. Also two heaters can be used in one aquarium, that is if the aquarium has a capacity of 50 gallons or more. Two heaters would be necessary to heat it efficiently if the very large aquariums are kept in cold rooms. Each heater will heat aquariums from 10 to 45-gallon capacity. This immersion heater is constructed with a special chromalox element. The element is guaranteed for one year. No. 1 outfit furnished complete with one heater as illustrated.

Price\$5.75
Additional heaters, each..... 2.75

NO. 5 HEATER
Price \$1.00

No. 5. These heaters come in single watts for following size aquariums. **Don't forget to state gallon capacity of your aquarium or wattage desired.** We can supply them as follows:

2 to 4 gal. tanks, 10-watt.
4 to 5 gal. tanks, 20-watt.
6 to 9 gal. tanks, 30-watt.
9 to 15 gal. tanks, 40-watt.
16 to 25 gal. tanks, 60-watt.
25 to 35 gal. tanks, 80-watt.

Any of these priced at.....\$1.00

No. 5 heaters can also be supplied to be used on 32-volt generating plants in 30 and 60 watts at \$1.50 each.

NOTICE

The heating elements in No. 2 and No. 5 heaters can be replaced when burned out. Price of additional elements, each 35c. Installation of elements very simple. Element in No. 1 heater guaranteed for one year.

No. 2 HEATER
PRICE \$4.00

This **No. 2** heater is built into one unit complete with thermostat control, which is enclosed in a 6 in. x 3/4 in. glass tube. The heating element housing is made from heavy copper tubing which is nicked, then chromium-plated. They last quite a number of years continually submerged in water. A good feature not to be overlooked is the fact that the heating element can be easily replaced for only 35c postpaid in case it burns out. A very popular and serviceable heater for aquariums holding 15 to 35 gallons of water.

Glass Tube Heater

These Glass Tube Heaters are supplied with waterproof tops, rubber suction hangers, and complete with plug and 6-foot extension cords.

6-inch heaters can be supplied in following wattages: 10-watt, 20-watt, 30-watt, 40-watt.
Price complete, each.....\$0.85

8-inch glass tube heaters can be supplied in 40-watt, 60-watt, 80-watt. Complete as illustrated. Each\$0.95

Do not compare this new type glass tube heater to the old sand filled type. The glass tubes are strong and can stand 800° F. without breaking. The special nichrome element is entirely enclosed in copper which is rust resisting and a quick conductor of heat, giving this low priced heater all of the quality of a higher priced article.

Submerged Aquarium Reflector

This reflector is made to hang on the inside in the aquarium. It is five inches long and one inch in diameter. Besides light, it also produces a little heat which makes it very practical for tropical aquariums. Supplied complete with bulb, rubber hanger and rubber extension cord.

Price each.....\$1.00
3 for\$2.50

No. 6

The "Watchman" Automatic Glass Tube Heater No. 6

This automatic heater is designed for aquariums from 4 to 20-gallon capacity. The thermostat is set to maintain a temperature of 76° F. However an adjustment is possible by turning the small set screw on the back plate. A fraction turn to the right increases the temperature.

Price each.....\$2.00
3 for 5.60

All of Our Automatic Heaters Are Fitted with Condensers to Prevent Radio Interference.

ARE BELDT'S HEATERS SATISFACTORY?

Kingsport, Tenn.

I have been ordering from you occasionally for two years and found my dealings with you have always been pleasant.

MRS. J. W. HARRISON.

Deer Park, Wash.

I sent to you for an aquarium last fall and have been real pleased with it.

MRS. S. SAWYER.

Norman, Okla.

I'd like to express my sincere thanks for and appreciation of your excellent service during the year of 1938. I've been very much satisfied with your shipments.

MICHAEL IVANOFF.

Walla Walla, Washington.

It might interest you to know that the aquarium, thermostat and heaters I bought from you about five years ago are all working still. No leaks in the aquarium, and the electric equipment giving excellent service.

JOHN PEMBERTON.

Youngtown, Ohio.

I found the heater which you sent me most satisfactory.

MR. WALLACE DILLON.

THERMOSTATIC CONTROLS
AND
AIR RELEASERS

Condenser Plug

Each 35c, postpaid

For the elimination of Radio interference, to be used with any type of thermostat you now have.

Note

When adjusting these thermostats, a fraction turn to the right increases the temperature and to the left lowers the temperature.

Schickerling Ultra Violet Lamps

These new patented Ultra Violet Lamps will operate on 110 volts A. C. or D. C. currents. Tropical fish and plants can be kept without sunlight in good growing condition and healthy. If you are unable to keep your fish in a southern or eastern exposure this is just what you need. For the winter months they are indispensable.

Automatic Syphon

This simple little device automatically empties bowls and aquariums. Just put it in the water as shown in illustration and the water starts running on its own accord. It is much safer to carry an empty bowl than a full one.

Billings, Mont.

You will no doubt recall that I am an old customer of yours and have had several shipments of tropical fish. Your stock has come up to my expectations in every case.

R. C. PRATER.

Toronto, Ontario, Canada.

Very pleased with condition of your fish on arrival in Toronto. Considering that we are in the 5th zone, it is remarkable as I haven't lost a fish.

J. R. CLAPP.

Ashton, South Dakota.

My friend has five aquariums stocked with your fish and they are the best collection I have ever seen.

MRS. RAYMOND HAGMANN.

Tyndall, South Dakota.

Fish arrived Saturday evening, everything Oke, and none dead. They are a nice bunch of fish.

S. G. BERRY.

If you want this order shipped to another person or to a temporary or different address from that shown above, give directions here.

Express Office (if defferent from Post Office).....

TERMS: CASH WITH ORDER. No C. O. D. shipments unless 25 per cent remittance is made with order. Parcel post shipments can be made on all plants, snails, etc. Glass items are best sent by express or freight. Aquariums or fish can not be sent by mail.

On orders for aquarium plants and snails amounting to less than \$1.00 an additional remittance of 15c is required to cover parcel post and packing charge.

KINDLY USE THIS ORDER BLANK—IT MAKES IT EASIER FOR YOU AND FOR US AND PREVENTS MISTAKES. If you want to write a letter, use separate sheet, then your order and your letter, will both get immediate attention.

A SUGGESTION

When ordering plants or fish, it is well to remember that snails can be sent along either in water or packed in damp moss with plants at no additional carrying charge.

DIRECTIONS TO CUSTOMERS
WHEN WRITING IN REGARDS TO YOUR ORDERS
BE SURE TO MENTION ORDER NUMBER

Forwarding

All shipments of live stock are forwarded via express; also all glass articles. We guarantee glass articles only if forwarded via express and in case of damage in transit will replace all articles gratis only if a bad order is obtained from express company and mailed to us. We do not pay express charges on replacements or on original orders. We do not guarantee live stock sent through mail.

We do not pay postage or expressage on any shipments. All price quotations in this catalog are strictly net F. O. B. St. Louis except on items listed postpaid. Do not remit any money to cover express charges as these are collected when the express man delivers the goods. If you desire items sent parcel post, make your remittance large enough to cover postage. We can not guarantee parcel post shipments against damage or loss.

Correspondence

We can not give detailed information concerning breeding habits, etc., of fish. In order to properly do so would require hours of writing concerning some of the varieties. Include with all inquiries a self addressed and stamped envelope.

Claims

We can not entertain claims unless they are made within 3 days upon receipt of shipment.

Cash with Orders

Please send sufficient money with order to cover the whole bill. We decline to ship "Collect on Delivery" unless 50 per cent remittance be made to guarantee acceptance.

Shipping Cans

See directions for Goldfish shipping cans on page 21.

Directions for Tropical Fish Shipments and Shipping Cans on Page 25

Shipping Season

We ship everything listed in this catalog all year around. During cold weather tropical fish are shipped in thermos cans. We reserve the right to delay orders, should weather conditions arise that may call for delays on shipments, and such delay, in no way, should be a cause for cancellation of orders.

Canadian Shipments

Obtain a permit to import plants from the Department of Agriculture, Ottawa, Ontario. Send us permit number. You keep the original copy of permit.

Non-Warranty

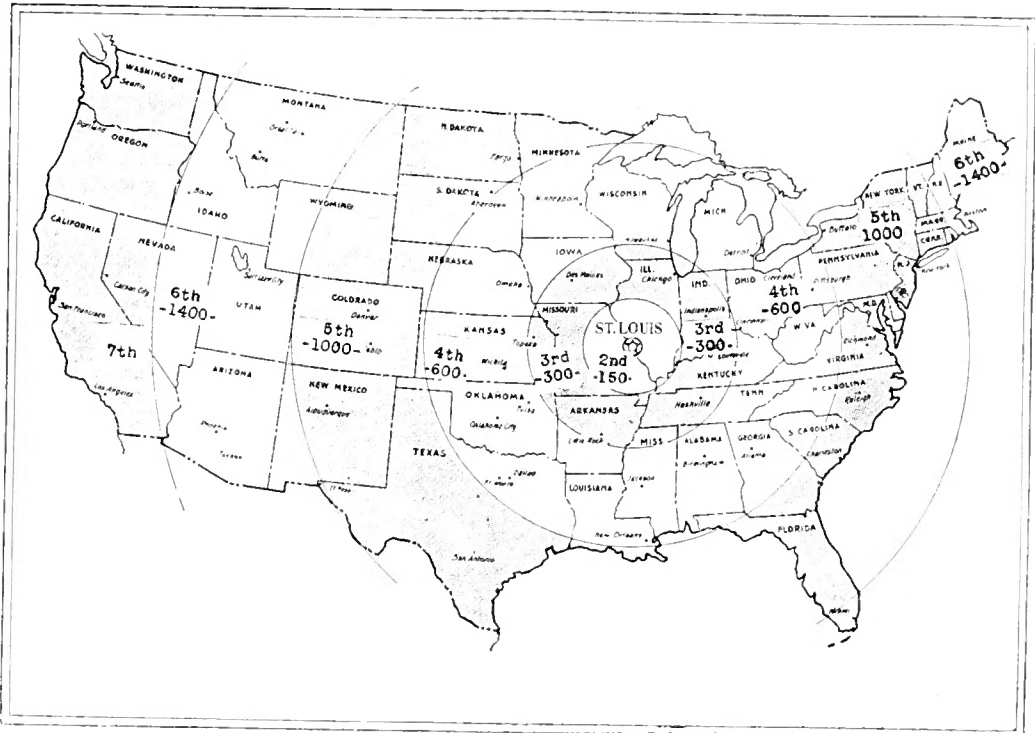

Various conditions, such as unfavorable weather, improper planting, etc., may cause poor results. We send out only first quality stock, but we give no warranty as to productiveness or description.

Selecting Tropical Fish

Not all varieties listed can be shipped in one can. Customers desiring only such varieties that can be kept together in one aquarium should order those marked * which are known as "Happy Family Fish."

Pairs

Quite often a fancier wishes to match odd fish in order to pair them. You can purchase either sex at one-half the catalog price as quoted for pairs, except Veiltail Bettas.

How to Figure Transportation Charges.

An average order for tropical or goldfish weighs from 10 to 20 lbs. In order that you may determine express or parcel post rates from St. Louis we are listing below 5-lb. parcel post rates and 20-lb. express rates.

Approximate Express Rates on Live Fish

	2nd Zone	3rd Zone	4th Zone	5th Zone	6th Zone	7th Zone
5 lbs.	.25	.30	.35	.45	.60	.60
10 lbs.	.31	.40	.50	.65	.94	1.06
20 lbs.	.51	.60	.83	.98	1.78	2.01
50 lbs.	1.12	1.34	1.92	2.30	4.28	4.86
100 lbs.	2.04	2.48	3.63	4.40	8.36	9.51

Approximate Parcel Post Rates on 5-Lb. Packages

50 miles 9c	50 to 150 miles 13c	150 to 300 miles 17c	300 to 600 miles 24c
600 to 1000 miles 33c	1000 to 1400 miles 40c	1400 to 1800 miles 50c	Over 1800 miles 59c

Per lb., postpaid	\$0.50
Three lbs. for	\$1.25

Medicated Aquarium and Pool Neutralizers

These medicated water neutralizers are necessary to counteract acid conditions in aquariums or pools. For aquariums, just use one at the time.

If water is acid they gradually disappear, depending on the amount of acidity in the water. For pools, they may be used one for each 100 gallons of water. They do not injure plants or fish; they only help to keep the water fresh and from becoming too acid.

Price postpaid 6 for 50c; Dozen, 80c
F. O. B. St. Louis, 50 for \$2.00;
100 for \$3.00

COLLECTION No. 5

The gold helleri or swordtail grows similar in size to the well known Mexican Swordtail. It differs in color only. No. 2 and No. 4 show the variations in colors of the Betta from Cambodia (Cambodia is a small state near Siam in China). No. 3, the blood red moon, is well known and is a live bearer, the same as the gold helleri. No. 5, Pearl danio, scientifically known as the Brachydanio albolineatus, more commonly known as the Mother of Pearl fish, is a native of India, very hardy and an egglayer. All of these species are ideal community tank fish and peaceful. Two Betta males, however, cannot be kept in the same tank. They are also known as Siamese Fighting Fish.

No. 1. Gold Helleri. Pair.....	\$1.00
No. 2. Betta Cambodia. Pair.....	1.00
No. 3. Blood Red Moon. Pair.....	.60
No. 5. Pearl Danio. Pair.....	.40
Catalog Price.....	\$3.00

Collection No. 5

Special Collection Price.....\$2.75
Shipping container extra.

This Collection can be kept in a five-gallon aquarium.

NEW FANCY COLORED VARIATUS

The red males vary in colors and designs like the original variatus. The most remarkable thing about the black variatus No. 49 is the fact that they breed 100 per cent true with only minor color variations. It is the only fish known where all of the male babies are born black and the females white, and also the only fish on which the sexes may be distinguished at birth. The red variatus is hardy and able to stand temporary temperatures of 45° F.
